1 Applying cryptographic techniques to problems in media space security   ■

Ian E. Smith, Scott E. Hudson, Elizabeth D. Mynatt, John R. Selbie

August 1995 **Proceedings of conference on Organizational computing systems**

Full text available: [📄] pdf(967.50 KB)   Additional Information: full citation, abstract, references, citings, index terms

Media spaces integrate audio, video, and computing systems for the purpose of remote collaboration and awareness, frequently between people engaged in a cooperative task. Technological advances have made these systems feasible using desktop computers and broadband, digital networks. Using a media space over a shared network requires that numerous security and privacy issues be addressed. One advantage of digital media spaces is that properties of the media space can be manipulated so that u ...

3 Papers: collaborating through documents: FLANNEL: adding computation to electronic   ☐
mail during transmission

Victoria Bellotti, Nicolas Ducheneaut, Mark Howard, Christine Neuwirth, Ian Smith, Trevor Smith

October 2002 **Proceedings of the 15th annual ACM symposium on User interface software and technology**

Full text available: [📄] pdf(374.21 KB)   Additional Information: full citation, abstract, references, citings, index terms

In this paper, we describe FLANNEL, an architecture for adding computational capabilities to email. FLANNEL allows email to be modified by an application while in transit between sender and receiver. This modification is done without modification to the endpoints---mail clients--- at either end. This paper also describes interaction techniques that we have developed to allow senders of email to quickly and easily select computations to be performed by FLANNEL. Through, our experience, we explain ...
